

FUTURE HAIR AFTERCARE ADVICE

NEVER EXPOSE A FUTURE HAIR PIECE TO HIGH HEAT* OR NAKED FLAME.

Future hair is a human hair and high heat synthetic mix and you should not apply any high heat to the piece and avoid opening oven doors and standing under overhead heaters. This will burn the fibre. Please note that eventually the fibre content will wear out and frizz - the name for this is 'Friction Frizz'. Our **Trendco Moisture Protect** helps reduce Friction Frizz and helps ease tangles. Please apply this sparingly a couple of times in between washes and when using heat tools*.

Never wash in hot water.

When brushing future hair, we recommend using a soft brush. Be gentle when brushing your wig/piece when it is wet. Our **Pureology Colour Fanatic** and **Miracle Filler** help ease tangles. Please apply this sparingly a couple of times in between washes.

The expected lifespan for a short future hair wig is 4-6 months, a mid-length (or bob) is between 3-4 months and a long wig is 2-3 months. Hairpieces are expected to last 4-6 months. These time frames are only approximate and are based on everyday wear.

The human hair part will naturally oxidise resulting in colour fade. This happens within the first few months of exposure to the environment and outdoors. However, the colour in the human hair part can be restored. Should you need to darken your hair, please seek professional advice. Please note that the synthetic part cannot be coloured.

All hair naturally tangles at the nape of the neck so it is recommended that long human hair is brushed gently numerous times a day, from the ends to the roots. For a thorough condition use a good quality conditioning mask at least once a month in conjunction with **Trendco Moisture Protect**.

Future Hair wigs and pieces are hand-tied which allows you to change the parting and hair direction

We do not recommend sleeping in your wig/hairpiece - it will cut the lifespan by at least half.

If you have hair underneath a wig and need more stability, we advise you to use Snap Lok Clips, Kirby Grips or wear a wig cap for extra security. Most wigs/pieces can be secured with Mono Tape if you have complete hair loss.

Most importantly, please do not hesitate to contact us if you have any questions or queries. **T:** 01273 774977 **W:** www.trendco.co.uk **E:** info@trendco.co.uk

WASHING INSTRUCTIONS OVERLEAF

FUTURE HAIR WASHING INSTRUCTIONS

If worn daily, we recommend that you wash your piece every 7-10 days.

1. Prior to washing remove all knots and tangles.
2. Fill a bowl or sink with tepid water and a little **Pureology Shampoo**. Immerse the wig or hairpiece in the water. Rinse. Repeat if desired.
3. Using your hands smooth through some **Pureology Conditioner**. Leave this to soak for a few minutes then rinse thoroughly.
4. Wrap in a towel to remove excess water. This is when you can apply a conditioning mask.
5. Very gently brush your hairpiece or wig. Place on a polyhead or wig stand.
6. At this stage, whilst it is damp, lightly spray on the **Pureology Colour Fanatic**. Leave to dry naturally overnight or use a hairdryer*.
7. In the morning or once dry style your wig/hairpiece with heat tools* and/or by using **Redken Styling Products**.

***Heated appliances:** Future hair is very versatile: it can be blow-dried, straightened, curled, crimped or rolled-up. However, please do not exceed 140°, use tools with a temperature gauge. Do not continuously apply heat to your future hair, this can cause permanent damage.
